

Carrier Transicold Australia will be providing an exclusive training session for authorised technicians at the Wire & GAS convention on the Gold Coast (June 8-9).

The training will include details and information on the following:

- Latest model Carrier direct drive units
- Updated service modules for Carrier Trailer units
- Upgrade information for Carrier TruTech service software and procedures.

The sessions are open to VASA members who hold RAC refrigeration licences or licences with a transport refrigeration endorsement, or alternatively any member who is already an authorised Carrier Transicold service agent.

This training segment is a result of previous feedback from members to have more focus on transport and refrigeration applications at VASA conventions.

There is only a limited number of seats available, so all interested technicians attending Wire & Gas should complete this form and fax or email it back as soon as possible to secure a seat.

<b>Name</b>	
<b>Employment</b>	
<b>Carrier Service agent</b>	Y/N
<b>RAC licence type</b>
