

Policies and measures in the European Union that reduce HFCs and promote alternatives

Philip Owen – European Commission

HFC relevant policies

Focus on:

- **Overall phase-down of HFCs**
- **Relevant, specific prohibitions**
- **GWP limit for mobile air conditioning**
- **Waste electrical goods**
- **Eco-design – environmental performance**
- **Public procurement**

Drivers of new policies and approach used

- **Keeping climate change below 2°C**
- **Limitations of pre-2014 legislative framework**
- **Availability of cost effective, safe and energy efficient alternatives**
- **Avoiding use, limiting emissions and working with stakeholders to result in the 2014 EU F-gas Regulation**

Key challenges for successful implementation

Supporting innovation

Enhancing industry acceptance

Legislation or a voluntary system?

A global level playing field
